

WolfPac® SG Series

The WolfPac SG Series provides a secure and reliable foundation from which to connect to the Internet.

The WolfPac SG Series Security Platform provides a secure and reliable foundation from which to connect to the Internet. The WolfPac SG comes equipped with three PCI slots for WAN, LAN and DMZ connections. Offered with a 1.2 GHz processor, a 40 GB hard drive and 128 MB of RAM, the WolfPac SG premium performance options complement an extensive list of network security features and services.

Encased in a tamper-resistant, rack-mountable steel case with standard 2U footprint, the WolfPac SG represents a smart solution for big and small businesses alike. In addition, the WolfPac SG can be monitored and configured remotely using NetWolves' Secure Remote Monitoring and Management (SRM²) system.

The WolfPac SG Series comes standard with ICSA-certified firewall technology as well as extensive local logging and reporting functions. Other available NetWolves network security applications and services include:

- IPsec gateway and client VPN
- Clientless SSL VPN
- ASURERoute intelligent failover includes support for dial back-up, IP-based terrestrial services and wireless services such as VSAT and EV-DO
- Congestion management
- High availability with VRRP
- Intrusion detection system
- Quality of service
- Content filtering
- Email virus protection
- Internal and external (split) proxy services
- Mail server supports SMTP, IMAP4 and POP3
- Advanced routing protocols, including BGP, OSPF, RIP, and GRE tunneling
- Backup & restore email accounts, password files, web content and shared files
- Apache web server

WolfPac SG Scalable security services include ICSA-certified firewall, IPsec and SSL VPN, intrusion detection, ASURERoute, congestion management, advanced routing, quality of service, email virus protection, and content filtering.

Businesses may choose to monitor their own network using NetWolves' Secure Remote Monitoring and Management System (SRM²). NetWolves can also provide 24x7 backup of a customer's SRM² system.

WolfPac SG2020 includes an AMD 2200 Sempron (1.2 Ghz) CPU, 128 MB RAM and 40 GB hard drive.

Interfaces:

The SG2020 includes three 10/100 Ethernet interfaces and a DB9 console interface.

Power:

110-250 VAC, 50/60 Hz

Case:

Both models are enclosed in a 2U powder-coated rack-mountable steel case.

Dimensions (in/cm):

17.5/44.5 wide by 3.5/8.9 high by 10.75/27.3 deep, without rack ears.

Weight (lbs/kg):

14/6.36

Normal Operating Environment spec:
